

### **Q1. About myself ?**

I am a junior web developer and love to work with React. I have the ability to develop single page web applications and make them responsive. I have a good understanding of frontend web technologies and tools. Such as HTML, CSS, Javascript, React. Also, I have a basic knowledge about NodeJS, ExpressJS, and MongoDB. I have done a couple of projects using these technologies. I am confident in my ability to contribute to any project. I am looking for an opportunity to use my skills & make a positive impact on the web.

### **Q2. About my best project. It's features & challenges I've faced?**

I have done a couple of projects and the most challenging and latest one was "Metalik". It is a carpentry manufacturer full-stack website. The main features of this project is,

1. Login and registration system using firebase authentication.
2. Users can buy and pay through card. Also, can see their orders.
3. User can leave a review.
4. Admin can perform CRUD operation to manage the website and orders.
5. An Admin can appoint a user as an admin.

The challenges I've faced in when,

1. Implementing payment system using stripe.
2. Setting up user role (admin/user).
3. Using middleware to verify admin.

I had to google many times and searching things on stack-overflow.

### **Q3. why should we hire you?**

I believe that my skills and knowledge make me the best match for this position. I am hard-working and passionate about learn something new. I have the potential to take challenge & improve myself. I can assure you that I will be an asset to this company if I am chosen to contribute.

**Q4. What is your salary expectation?**

Being a fresher, salary is not my first priority. This is a very good platform to start my career. So, now I am expecting my salary as per the norms of your company structure.

**Q5. Do you have any questions for us?**

Thank you for asking.  
I have three questions.

1. If I were hired for this role, what would you want me to achieve in my first two months?
2. Can you describe the career growth opportunities here?
3. What's Your Tech Stack and Development Tools Do You Use?
